

WPGIS QUICK START

Secure access · correct scope · evidence-aware decisions

Start at <https://wpgis.org> · Use your authorised PNGSDP email and the one-time PIN. Never share the PIN.

01 SIGN IN & CHOOSE

Access Atlas — map, communities, services and assets
 Intelligence Hub — evidence, gaps and leadership brief
 Maintenance — airstrips, borewells and towers
 Programme — projects, manager review and CEO monitoring
 Finance — PRF workflow and expenditure visibility
 Administration — restricted governed updates

02 USE THE DECISION CHAIN

1. Scope — set filters
2. Read — source, date, status
3. Interpret — state limitation
4. Act — use correct workflow
5. Assure — audit and approval

GREEN

Functional

YELLOW

Work in progress

ORANGE

Planned / verify

RED

Not functional

ASK SIBALA WELL Name the place and district/LLG, evidence class, status/time, source and limitation. Example: Which functional borewells are mapped in [LLG], what mapped population is within 3 km, and what remains unverified?

FIVE GUARDRAILS Planning is not navigation · Presence is not functionality · Never infer a blank · Do not enter sensitive data · Keep the audit trail.

Before reporting State the scope, source, evidence date and limitation. Clear filters before the next question. Escalate privacy, access or audit issues immediately.
